Experience

Empathy.co

Senior Frontend Software Engineer

May. 2022 – Mar. 2026

Gijón, España (Remote)

- Drove Playboard migration (2025- 2026) Vue'React/Next.js zero-downtime for merchandisers, using AI-assisted development. Enabled parallel feature delivery across internal + client teams.
- Led front-end squad (2022-24) shipping Playboard features for Kroger digital merchandisers to optimize search + conversions. Drove cross-functional alignment + Clean Architecture for scalable code.

Capitole Consulting

Front-end Developer

Sep. 2021 – May. 2022

Madrid, España

- Delivered key web features and performance enhancements for Viajes El Corte Inglés, resulting in an improved user experience.

Leadtech

Frontend Developer

Nov. 2020 – Aug. 2021

Barcelona, España

- Developed and deployed key web features and performance enhancements for an US passport assistance platform.
- Improve the structure of the project to handle different templates and themes with Sass.

Global Think Technology

Frontend Developer

Jul. 2018 – Aug. 2020

Córdoba, Argentina

- Developed from scratch an app to handle multiple messages from different apps.
- Developed from scratch an app to track and manage renting cars in realtime.
- Developed hybrid mobile applications using Apache Cordova and desktop apps with Electron.

Projects

Playtiva

<https://playtiva.vercel.app>

Cross-platform app for padel and tennis players to find matches, fill rosters, record results, and track personal stats

My Photo Gallery

<https://maxi-photo-gallery.vercel.app>

Immersive personal photo gallery. Visitors arrive at an entrance, then walk a 3D corridor past framed photographs — one work per stop — using arrow keys or swipe.

Mockingbird

<https://mockingbird.vercel.app/>

A lightweight HTTP request interceptor and mocking tool for seamless API debugging and network manipulation.

Fetcher

<https://fetcherapi.vercel.app>

Fetcher is a lightweight and developer-friendly REST API client for testing, debugging, and managing HTTP requests.

Conter Strai

<https://conter-strai.onrender.com>

Browser-based tactical shooter inspired by Counter-Strike.

Run JS Playground

<https://runjs-playground.vercel.app>

Online JavaScript Playground

Iconify

<https://iconset-generator.vercel.app>

High-performance icon set generator built with Astro and Sharp. Generate favicons, PWA icons, iOS, and Android assets in seconds.

Smooth View Transitions

<https://view-transitionsapi.vercel.app>

Smooth, dependency-free theme transitions using the native View Transitions API. Just clean, high-performance animations built straight into the browser.

Education

IES University College

Computer Systems Analysis
